Education

KIET Group of Institutions
Bachelor of Technology in Computer Science Engineering; CGPA: 8.0
Ghaziabad, Uttar Pradesh
Aug 2024 – May 2028
GN National Public School
Senior Secondary (CBSE)(2023): 85.2% | Secondary (CBSE)(2021): 89.3%
Gorakhpur, Uttar Pradesh

Technical Skills

Programming Languages : Java, C++, C, Javascript, Python
Web Technologies : HTML5, CSS3, React, Node.js, Express.js,
Databases & Tools : MySQL, MongoDB, PostgreSQL, Git, GitHub, VS Code, Postman
Frameworks & Concepts : Spring Boot, Object-Oriented Programming, Data Structures & Algorithms,
Core Competencies : Problem Solving, Algorithm Design, Database Management, Version Control, Team Collaboration

Certifications

- AWS Certified Cloud Practitioner – Amazon Web Services (March 2026)
- Java Spring Boot Certification – Infosys (November 2025)
- Network Technician Career Path – Cisco (April 2026)

Achievements

- Achieved 1000 rating on CodeChef
- 900 rating on Codeforces
- Solved 200+ problems in Data Structures, Algorithms, and Competitive Programming

Projects

Amazon Clone Frontend

- Developed a responsive Amazon homepage clone using HTML5 and CSS3, focusing on clean layout design, UI structure, and visual consistency.
- Implemented key e-commerce sections such as navigation bar, search bar, product category cards, hero banner, shopping panels, and footer.
- Improved understanding of frontend layout building, component structuring, and real-world website design patterns by recreating a professional e-commerce homepage.

Air Quality Monitoring System

Team Size - 4

- Developed an Air Quality Monitoring System as a first-year academic project to monitor and analyze environmental air quality parameters.
- Collaborated with a team of four members in the design, implementation, and presentation phases of the project, ensuring effective coordination and task distribution.
- Worked on collecting and displaying air quality data, gaining practical exposure to IoT concepts, sensor integration, data monitoring, and system development.

Extracurricular Activities

Technical Community Participation

- Actively participated in coding contests and problem-solving sessions to strengthen Data Structures & Algorithms skills.
- Engaged in peer learning discussions on competitive programming, web development, and emerging technologies.

Smart India Hackathon (SIH) 2025 – Participant

- Participated in Smart India Hackathon (SIH) 2025, collaborating with team members to brainstorm, design, and develop innovative solutions for real-world problem statements.
- Contributed to problem analysis, solution ideation, and technical discussions while exploring practical applications of software development and emerging technologies
